DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 2, 5-8, 12, 20, 22, 24, 28-31, wherein the technical feature is the display means.

Group II, claim(s) 9-10, wherein the special technical feature is the slicing means.

Group III, claim(s) 11, wherein the special technical feature is the rotating means.

Group IV, claim(s) 23, wherein the special technical feature is the recording means.

Group V, claim(s) 27, wherein the special technical feature is the input means.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature in all groups is the position information detecting means. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. The international search has revealed that the technical feature is not novel since it is disclosed in JP 5-269132 A (Toshiba Corp.), 19 October, 1993 (19.10.93) and JP 11-318904 A (Olympus Optical Co., Ltd.), 24 November, 1999 (24.11.99). Consequently, Groups I-V do not comply with the requirement of unity of

invention. Claims 1, 3-4, 13-19, 21, 25-26, 32 will be examined with the elected invention.

3. A telephone call was made to Mr. John C. Pokotylo at (732) 542-9070 on July 2, 2007 @ 12:48 pm to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helene Bor whose telephone number is 571-272-2947. The examiner can normally be reached on M-F 8:30am-5:00pm.

Art Unit: 3768

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eleni Mantis-Mercader can be reached on 571-272-4740. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
